Why coho?

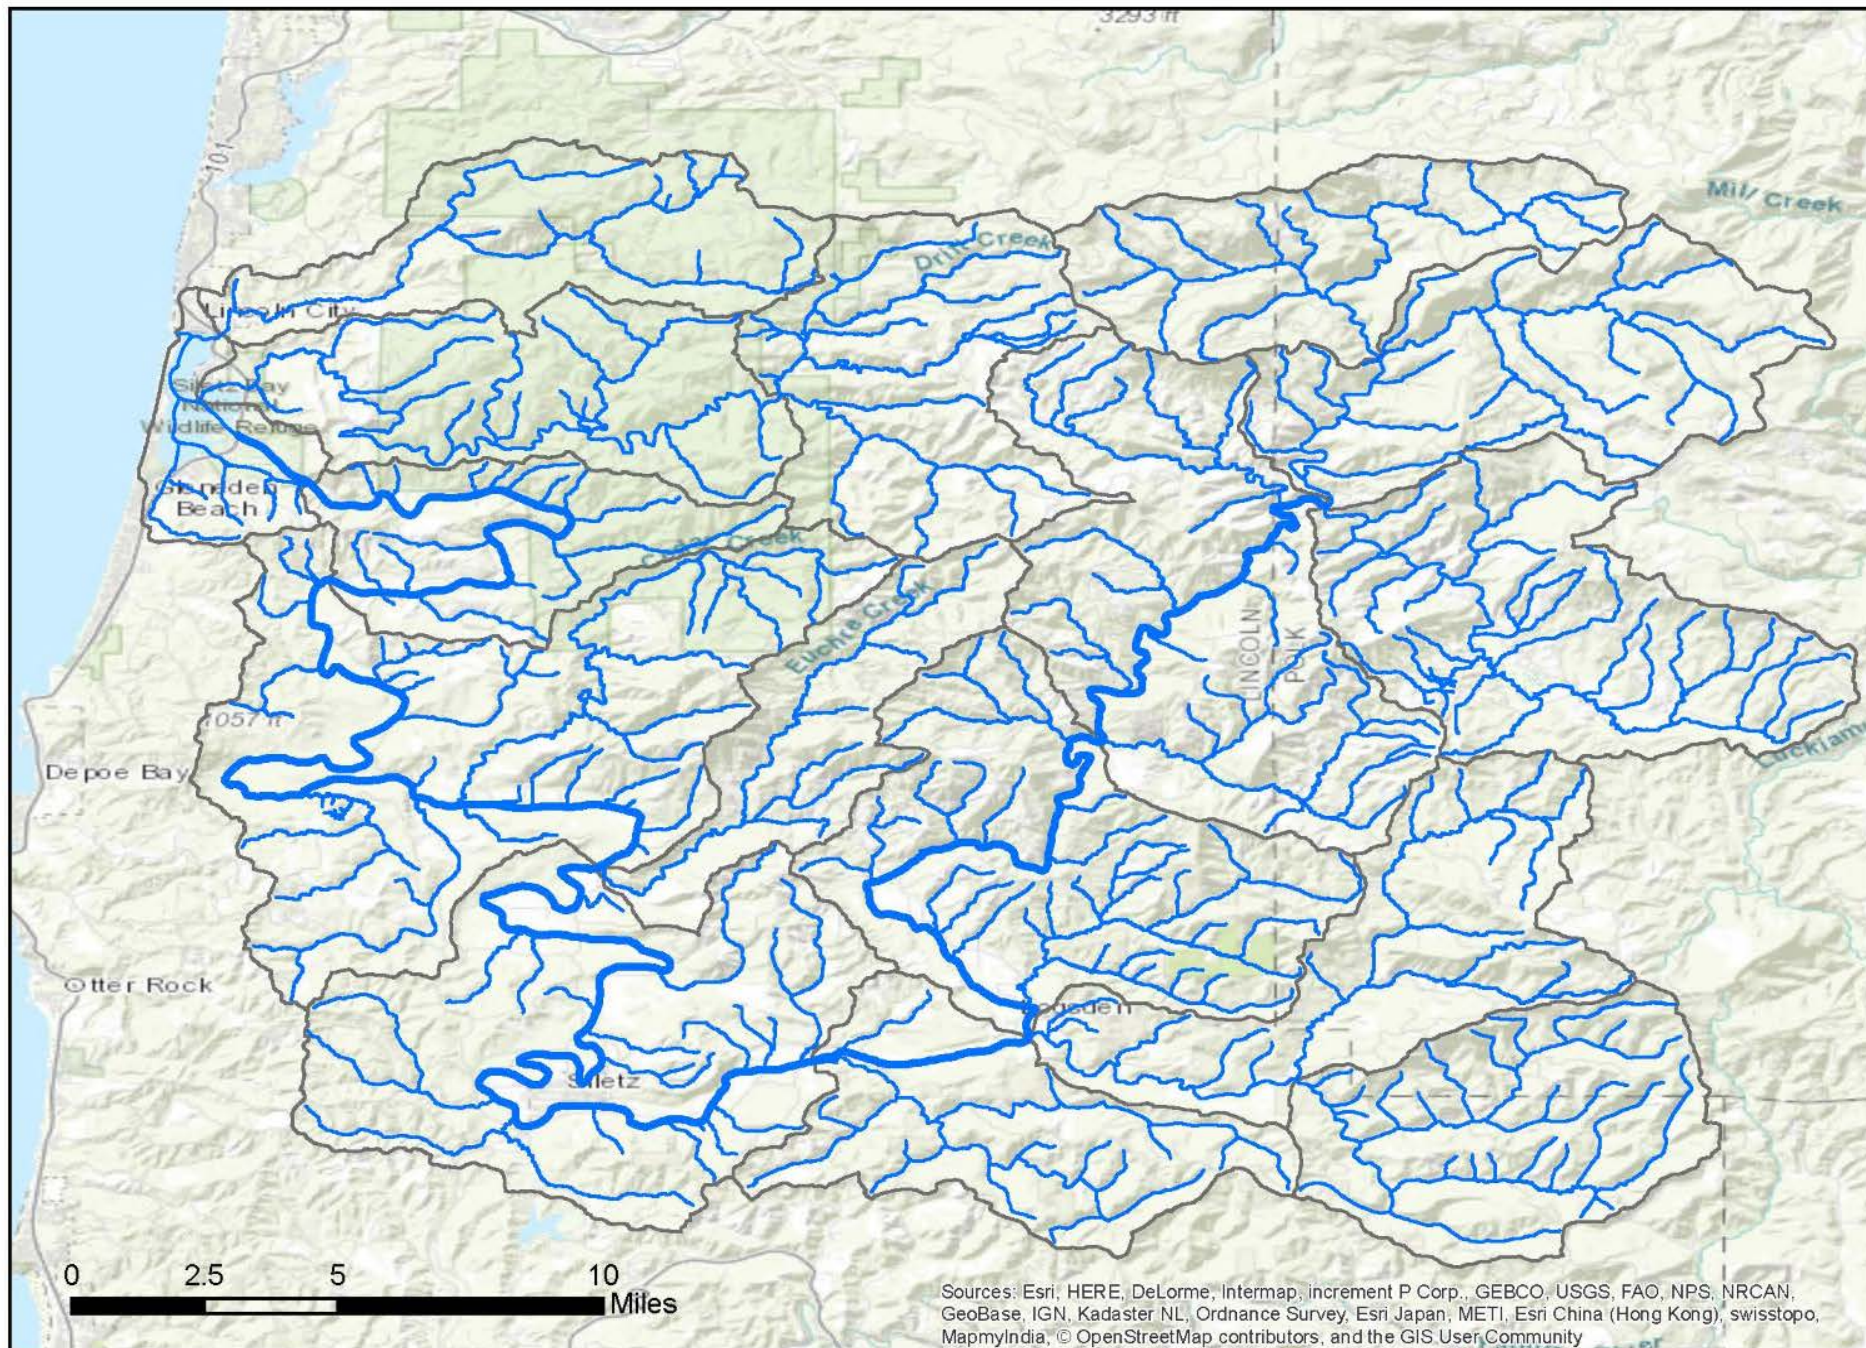

Focused on Life History Diversity

# Siletz Basin Overview

A scenic photograph of a river flowing over mossy rocks in a forest. The water is captured with a long exposure, creating a smooth, white, silky texture as it cascades over the dark, moss-covered boulders. The surrounding forest is dense with green foliage, and some trees have bare branches, suggesting a late autumn or early spring setting. The lighting is soft, with some areas of the forest floor and rocks illuminated by natural light.

# Thank you!
