

Appendix F. Issues Identified During Collaborative Planning but not Carried Forward

The following are issues that were identified, during plan development, that were not carried forward for one or more reasons, including:

- They were not considered as high a priority as other issues that were addressed during the planning process.
- This voluntary planning partnership was not the most appropriate venue to address the issues.
- Other entities in the region have responsibilities for addressing.

They include:

<p>Water Quantity</p> <ul style="list-style-type: none"> ▪ Water Quantity for Navigation ▪ Forest Management for Water Quantity ▪ Limited Storage Capacity (Built and Natural) <p>Water Quality</p> <ul style="list-style-type: none"> ▪ Beach Water Quality ▪ Water Quality for Consumption of Fish and Shellfish ▪ Water Quality for Aquaculture and Shellfish Production ▪ Wastewater Treatment Capacity and Overflows ▪ Septic System Maintenance and Water Quality ▪ Biosolids Application and Water Quality (Stream Health and Drinking Water) ▪ Pesticide Application and Drinking Water Quality ▪ Emerging Contaminants of Concern (PFAs, pharmaceuticals, plastics) ▪ Harmful Algal Blooms <p>Watershed Health</p> <ul style="list-style-type: none"> ▪ Fish Passage Barriers ▪ Channel Modification and Habitat Complexity 	<p>Infrastructure</p> <ul style="list-style-type: none"> ▪ Failing Septic Systems and Water Quality ▪ Fish Passage Barriers ▪ Channel Modification and Habitat Complexity ▪ Relationship Between Built Infrastructure and Ecological Processes <p>Natural Hazards and Vulnerabilities</p> <ul style="list-style-type: none"> ▪ Cascadia Earthquake Water Supply Resiliency and Readiness ▪ Drought Planning and Resiliency <p>Climate Change</p> <ul style="list-style-type: none"> ▪ Reduced Water Quantity to Meet Multiple Competing Water Needs ▪ Increased Water Temperature Reducing Water Quality for Multiple Water Uses ▪ Increased Winter Storms and Flooding Events Threatening Infrastructure ▪ Sea Level Rise Impacts on Points of Diversion ▪ Sea Level Rise Impacts on Estuaries ▪ Increased Frequency of Forest Fires
