FIELD TOUR— Salmon River Hatchery Riparian Restoration Project

Tour Summary: The Salmon River Hatchery project consists of 4 project areas on Oregon Department of Fish and Wildlife (ODFW) and Oregon Department of Transportation (ODOT) lands totaling approximately 9 acres. The project consists of site preparation, noxious weed control, native tree and shrub planting, and livestock exclusion fencing to reduce erosion and nutrient inputs to surface waters of the Salmon River. Funding for the project comes from the US Forest Service Title II program and the Oregon Wildlife Fund.

Water Action Plan Actions Addressed: 44, 46, 47, 50

Time: 9:30 AM-11 AM, October 22

Meeting location: ODFW Salmon River Hatchery (575 N. North Bank Rd, Otis, OR 97368; located approximately 10 minutes outside of Lincoln City)

Parking: Parking is available at the ODFW Salmon River Hatchery visitor parking area and along the access road. We will walk to the Salmon River Hatchery project from the parking area.

Restrooms: Restrooms are available at the ODFW Salmon River Hatchery building.

Water and food: Please bring a water bottle and consider bringing a snack. We will carry some water as backup, and we will also bring snacks in case anyone needs a boost.

Footwear: We recommend sneakers or boots for walking in fields and riparian areas with some uneven terrain.
